Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 40-75 is/are pending in the application.

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 56-70 in the reply filed on 2-11-05 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 56-70 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsai et al (5,757,045).

The reference to Tsai shows all of the structural features of the claimed invention. For example, comparing Fig. 13 of Tsai with claim 1, Tsai teaches a semiconductor substrate (1), a gate structure (12) having sidewalls, a plurality of first diffusion regions (21) with a first dopant (phosphorus), where the diffusions are adjacent to the sidewalls of the gate structure, a plurality of second diffusion regions (22) having a second dopant (arsenic), where the second diffusion regions are adjacent to the gate sidewalls, and wherein each of the first diffusion regions is located beneath a respective second diffusion region, and where each of the first diffusion regions includes a portion extending beneath the gate, and where none of the second diffusion regions extends beneath the gate.

Tsai also teaches the relative claimed dopant concentrations where the first diffusion region may be doped in the range of $3E11$ to $2E12$ atoms per square centimeter. See, for example, the discussion at col. 6, l. 20. Tsai also teaches several embodiments where the dopants may be identical or of different conductivity types such as regions (210 and (23).

All of the claimed structural elements are taught by the Tsai reference.
